I am a Scientist!

by: ______________________
A Message to Grown-ups:

Children are natural scientists – full of questions and excited to learn. They love to explore, investigate, try things out, and “experiment” with what they see, hear, smell, taste, and touch. Everything you show and share with your child will give her new information, allow him to solve problems, and help develop basic science skills.

This booklet provides children with a thoughtful and fun way to think of themselves as a scientist! Here are some tips for using this booklet:

• Have a child draw a picture or paste a photograph or cut out pictures from magazines to paste on the pages

• Help the child write words; name, favorite color or insect

• Talk with the child about his favorite things or what she’s observed

• Use the words observe, discover, curious

• Remind the child of experiences he’s had before when he learned something new

Have fun!
I am a Scientist

This is me.

My name is: ________________________________

My favorite color is: _______________________

My favorite animal is: _____________________

My favorite insect is: _____________________
This is my family.

The tallest is: _______________________

The shortest is: ______________________
I discovered something (describe it):

____________________________________

____________________________________

____________________________________

I am curious about: ____________________

____________________________________

____________________________________

I have observed: _______________________

____________________________________

____________________________________

____________________________________
I solved a problem: __________
_________________________________________________________________
_________________________________________________________________
_________________________________________________________________

I like to build: __________
_________________________________________________________________
_________________________________________________________________
_________________________________________________________________
I am very smart. I know about a lot of things, such as: 

____________________

____________________

____________________

____________________

____________________

____________________

____________________

____________________
I know some shapes, colors and numbers!

shapes:

colors:

numbers:
I like reading. Sometimes a grown-up reads to me. Sometimes I read on my own.

I like songs and rhymes too. I can make up my own rhyme, such as: _______________________

_______________________________________

_______________________________________

_______________________________________

This is me reading a science book.
I want to learn even more Science things, such as: 

__________________________________________

__________________________________________

__________________________________________

__________________________________________

__________________________________________

__________________________________________

__________________________________________

Sometimes I am really happy about playing outdoors. These are things I discovered outside:

________________________________________________________________________

________________________________________________________________________

________________________________________________________________________
I want to be a color detective. Here are some colors I found:

I want to be a shape detective. Here are some shapes I found:
Some things that I recycle are:

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

I can make some recycle art like this:

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________

_____________________________________________________________________
When I observe things I use my 5 senses:

I hear: ____________________________

I see: ____________________________

I smell: ____________________________
When I’m a scientist I do these things:

- Observe
- Describe
- Categorize
- Communicate
- Record
- Experiment
- Predict
- Generalize
- Relate to Prior Experiences
- Problem Solve
- Collaborate
- Use Tools
